Summary

DevOps and Cloud Engineer with 5 years of experience in designing, automating, and managing scalable cloud-native infrastructure across AWS, Azure, and GCP environments. Skilled in Kubernetes (EKS, AKS, GKE), Terraform, Docker, CI/CD pipelines, Infrastructure as Code (IaC), GitOps, monitoring, observability, and SRE practices. Experienced in deploying production-grade Kubernetes platforms, automating cloud infrastructure, optimizing performance, and implementing centralized monitoring solutions.

Education

Indira Gandhi National Open University, Cochin *June 2022 – Aug 2026*
BCA in Computer Applications

Sreerama Gov Polytechnic College, Thiriprayar *August 2018 – July 2021*
Diploma in Electrical and Electronics, GPA: 8.5

Professional Experience

Senior Technical Analyst *Oct 2025 – Present*
PIT Solutions Pvt. Ltd., Kochi

- Managing multi-cloud DevOps environments across AWS, Azure, and Hetzner-hosted Kubernetes infrastructure for deploying production-grade applications.
- Built and maintained Kubernetes clusters on Hetzner infrastructure with high availability, auto-scaling, and workload optimization.
- Developed CI/CD pipelines using Azure DevOps and AWS CodePipeline, improving deployment efficiency and reducing manual release effort.
- Automated infrastructure provisioning using Terraform and configuration management using Ansible, reducing deployment time by 60%.
- Managed Docker-based containerized workloads and GitOps workflows for version-controlled infrastructure delivery.
- Designed and deployed organization-wide network monitoring using LibreNMS hosted on Kubernetes, improving infrastructure visibility and proactive alerting.
- Built and deployed a centralized observability platform on Kubernetes using Grafana, Prometheus, Loki, Mimir, Tempo, and Pyroscope for monitoring, logging, metrics, tracing, and profiling.
- Migrated monitoring workloads from Zabbix to a Kubernetes-based observability stack, enabling centralized monitoring across organizational applications.
- Collaborated with development teams to streamline deployment workflows and implement DevOps best practices.

System Engineer *Oct 2021 – Sep 2025*
Infosys Limited, Bangalore

- Architected and maintained enterprise-grade CI/CD pipelines using Azure DevOps, Jenkins, AWS CodePipeline, CodeBuild, and CodeDeploy, reducing release cycle time by 45%.
- Automated cloud infrastructure provisioning using Terraform and Infrastructure as Code (IaC), improving deployment consistency across 15+ production environments.
- Managed Kubernetes clusters (EKS, AKS, GKE) across multi-region environments, supporting zero-downtime deployments and high availability.
- Integrated Docker, GitOps workflows, and Ansible automation to reduce configuration drift and improve infrastructure reliability.
- Designed secure and scalable cloud solutions across AWS, Azure, and GCP using monitoring tools such as CloudWatch and Grafana for proactive monitoring and alerting.
- Improved infrastructure uptime and observability through centralized logging, monitoring, and alerting systems.

- Configured enterprise networking including DNS, VPN, TCP/IP, firewalls, and load balancing for secure cloud connectivity.
- Managed VMware virtualization environments for workload provisioning, migration, and infrastructure maintenance.

Technical Skills

Cloud Platforms: AWS, Azure, GCP

DevOps Tools: Terraform, Ansible, Kubernetes (EKS, AKS, GKE), Docker, Helm, GitOps, Azure DevOps, Jenkins, GitHub, ArgoCD, CloudFormation, IAM

Monitoring & Observability: Grafana, Prometheus, Loki, Tempo, Pyroscope, Mimir, Zabbix, LibreNMS, CloudWatch

CI/CD Tools: Azure DevOps, AWS CodePipeline, Jenkins

Programming: Bash, Python (Basic), C++

Operating Systems: Linux (Ubuntu, RHEL), Windows Server

Virtualization: VMware, Hyper-V

Networking: TCP/IP, DNS, VPN, Firewalls, Load Balancing

SRE Concepts: SLAs, SLOs, Incident Response, Monitoring, Observability

Others: Apache, MySQL, ServiceNow, Agile Methodology

Key Projects

Team Task Manager

DevOps Web Application

Built a real-time collaborative task management platform using AWS Lambda, API Gateway, DynamoDB, Cognito, ECS, and ECR. Automated deployments through CI/CD pipelines and delivered a globally accessible frontend hosted on S3 with CloudFront CDN, achieving below 100ms response latency.

Personal Brand Website

Portfolio Website

Developed and deployed a responsive personal portfolio website using HTML, CSS, JavaScript, AWS S3, and CloudFront, ensuring optimized load times below 200ms.

Certifications and Awards

Certifications:

AWS Certified Cloud Practitioner

Microsoft PL-300: Power BI Data Analyst

Microsoft MS-900: Microsoft 365 Fundamentals

AWS Solutions Architect Associate (Planned)

Awards:

Insta Award – Infosys: Led infrastructure provisioning for 3+ data center builds under tight SLAs.
